Profile

IT Service Engineer with practical experience across Microsoft 365, Active Directory, Entra ID, Windows infrastructure, networking and endpoint security. Experienced in troubleshooting device and infrastructure issues, managing access controls, maintaining asset records, documenting fixes, and improving IT visibility through clear processes and technical documentation.

Technical Skills

Infrastructure & Cloud: Microsoft 365, Active Directory, Microsoft Entra ID, Azure, Windows Server, DNS, DHCP, VLANs, Wi-Fi, remote access, patch panels, port mapping.

Security & Operations: Endpoint security, patch management, Cyber Essentials, ManageEngine Endpoint Central, PowerShell, technical documentation, knowledge base management, asset management.

Professional Experience

IT Service Engineer | Swagelok Central | Jul 2025 – Present

- Administer Active Directory and Microsoft Entra ID for onboarding, offboarding, access changes, group membership and account security.
- Deliver 1st/2nd line support for Microsoft 365, endpoints and remote access.
- Manage endpoint security, patching, asset inventory and device controls using ManageEngine Endpoint Central.
- Troubleshoot DNS, DHCP, VLANs, Wi-Fi and physical network connectivity issues.
- Create SOPs and technical documentation to improve repeatable IT processes.
- Implement security controls and remediation actions to support Cyber Essentials certification.

Shipping Auditor | Amazon | Sep 2018 – Sep 2024

- Monitored tracking systems and shipment data to identify discrepancies and maintain data accuracy.
- Investigated device and system issues with IT and Operations teams.
- Trained associates on handheld devices and internal systems.

IT Technician | DUEPUNTOZERO | Jan 2017 – Aug 2018

- Built, configured and deployed Windows desktop systems, including BIOS setup, OS installation, driver configuration and peripheral setup.
- Diagnosed and resolved hardware, software, user profile and system performance issues across desktop environments.
- Configured user accounts, IP settings, DNS and LAN connectivity.

Projects

Network Cabling & Port Mapping

- Traced network cables from server room patch panels to wall sockets and labelled matching port numbers.
- Documented port-to-location records to improve troubleshooting, hardware setup and site network visibility.

Windows Server & Infrastructure Build

- Built and configured a Windows Server environment with Active Directory, DNS, DHCP and Remote Desktop Services.
- Joined and tested Windows client devices, validating authentication, DNS resolution, DHCP leasing, RDP access and Entra ID sync scenarios.

IT Asset Management & Site Inventory

- Organised multi-site asset records for devices, accessories, users and desk locations.
- Created naming standards, lifecycle statuses, site maps and desk numbering to support audits, onboarding and hardware lifecycle tracking.

Knowledge Base Development

- Created and maintained a self-hosted knowledge base for common 1st line issues and troubleshooting steps.
- Documented recurring and less common 2nd line and infrastructure issues, producing clear write-ups of fixes, processes and support guidance.

Vulnerability Assessment Lab

- Scanned test systems with Nmap and OpenVAS to identify exposed services and weaknesses across FTP, SSH, Telnet and SMB.
- Documented findings, risks and mitigation steps through hands-on TryHackMe and OverTheWire practice.

Education

- BSc Computer Science | Arden University, 2024–2025
- HND Digital Technology | GBS, 2021–2023

Certifications

- CompTIA Security+
- Cisco Certified Network Associate (CCNA)
- CompTIA Secure Infrastructure Specialist (CSIS)
- CompTIA IT Operations Specialist (CIOS)
- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Security, Compliance, and Identity Fundamentals
